BADENIA 5

Overview

- 40 x analogue inputs
- 8 x independent CAN ports
- Fast 1GB Ethernet connectivity
- MATLAB/Simulink® strategy control

The Badenia 5 from Cosworth offers high-rate data logging, control, outputs and huge processing capabilities. Featuring up to 40 x analogue inputs, 4 x CAN ports, LIN, and 5 x digital inputs, the Badenia 5 is an extremely capable data logger.

Its 4 x HSD/PWM outputs result in the Badenia 5 being the ideal unit for complete vehicle control. Cosworth's auto-coding platform features as part of the Badenia 5 offering. This allows for custom strategies/models to be developed in a MATLAB/ Simulink® environment and deployed on the Badenia 5.

Electrical data	
Operating Voltage	6.6 to 31.5V
Current consumption**	572mA @ 14V
Communication	
Ethernet	1x 1000MB/s 2x 100MB/s
CAN Ports	4 x Independent CAN Ports Max BAUD rate; 1MBit/s 64 x Message Buffers per Port Software selectable 120Ω Resistor
LIN Ports	2x LIN Bus Master
EtherCAT	1 x EtherCAT Master
Serial Ports	2 x Bi-Directional RS232 Ports Split Tx and Rx Rates Max BAUD Rate: 115200
Debug	1 x Bi-Directional RS232 Fixed@115200 BAUD Rate
Mechanical data	
Size	118 x 120 x 34 mm
Weight	472 grams
Environmental	IP66
Vibration	Cosworth DV-V®
Case Material	6082-T6 Anodized
Operating Internal Temp	-20°C to + 70°C
Storage Temp	-20°C to + 80°C

I/O	
Logging Specifications	See 'Token Logging Options' below.
Analogue Inputs	40 x 0-5 Inputs 16-bit resolution Filtered 3dB freq of ~15.9kHz 2.1M Ω Impedance AIN 1-8 selectable 1K8 Pull Up
Digital Inputs	4 x High Frequency (10kHz) supports hall effect /VRS/DF11i 2 x Support IR Lap Timing & Switches Selectable 3k3 pull-up to 5V or Level Shift for Passive Sensors
Excitations	6 x 5V ±0.25% Supply @ 100mA 4 x Software Selectable 5V/12V 12V ±0.5% Supply @ 700mA
HSD / PWM	4 x HSD / PWM Battery voltage @ 700mA(max) 400Hz Maximum PWM Frequency
Motion Sensor	Accelerometer 3 axis ±16G
Internal Monitoring	Battery Voltage Box Temperature Excitation Voltage
LEDs	7 x System Status LEDs

Installation

- Make sure that the unit is protected against severe vibrations by mounting using supplied AV mounting kit. Also make sure that the unit is not fouling other structures which may experience severe vibrations.
- Make sure that the unit is mounted in a position where the unit will not come into contact with liquid.
- Make sure that the unit is positioned in an area with sufficient cooling air flow to prevent overheating.
- Make sure that the unit is mounted away from sources of electrical interference.

Connector information

Please note, pin allocation is in functional order, not pin number order.

Recycling and Environmental Protection

Cosworth Electronics is committed to conducting its business in an environmentally responsible manner and strive for high environmental standards.

Manufacture: Cosworth products comply with the appropriate requirements of the Restriction of Hazardous Substance (RoHS).

Disposal: Electronic equipment should be disposed of on accordance with the regulations in force and in particular in accordance with the Waste in Electrical and Electronic Equipment directive. (WEEE).

Battery

This equipment contains a rechargeable battery (Manganese Silicon Lithium).

The equipment may be returned to Cosworth Electronics for a replacement battery. A charge will be made for this service.

To remove the battery for recycling:

- Remove the case(s).
- Remove printed circuit boards from the case.
- Remove the battery from the printed circuit board.
- Dispose of the battery in accordance with the regulations in force.

Removal of the battery will result in the warranty of the unit being void.
